ActiveEon – Workflow Studio

Studio: Automate processes with a drag & drop interface

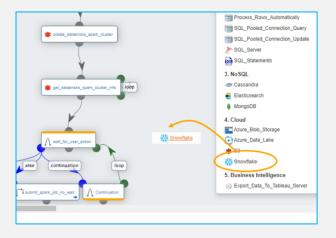

Save time

Use flowchart style diagramming to build automated process flows easily.

Workflows / Workflow_Example	
General Parameters 0	
Name 0	
Workflow_Example	Linux_Bash_Task
Project 0	
Description 0	
A workflow that executes multiples tasks with multiple languages.	🛓 Java_Taok
Documentation O user/ProActiveUserGuide.html#_java_ta	Python, Taak
Job Priority 0	
Workflow Variables	Canguage, R., Task
Generic Info 0	
Data Management	
Error Handling 0	JS Javasoript_Task

Better Productivity

Build multistep workflows fast with low-code and no-code reusable components

Expand Automation

Link end-to-end digital workflows to popular business apps with readyto-use integration connectors.
